

Making Progress with Handwriting

-  I can use a lead in stroke for all lower case letters.
-  My capitals are bigger than other letters and I know not to join them.
-  I use clear ascenders and descenders
-  I join all letters properly
-  The spaces between my words are about the size of a letter a.

-  My writing is joined and fluent and all letters are a legible, consistent size.

-  I can manipulate handwriting for different purposes e.g. bold, italic, capital letters.
-  I have a serviceable script that is unique to me. It enables me to write neatly and at speed.
